

Credit Recovery to Get Back on Track

For Students Who Are Falling Behind, Stride Learning Solutions Credit Recovery Picks You Back Up

School districts across the country are seeing more students struggle to pass courses during the pandemic. New online learning methods, inconsistent schedules, disengagement, and lack of direct instructional time are among the challenges that may feel beyond your control.

Fortunately, Stride Learning Solutions credit recovery courses are an effective way for students to get back on the path to graduation. Whether they're struggling with academic or personal challenges, students can get a second chance in their courses. And, with academic support by our certified teachers available 24/7 via chat, phone, and video conference, they can feel supported every step of the way.

Diagnostic-Driven, Motivational, and Self-Paced with Adaptive Release and Social Emotional Learning Support

For students who did not pass a course initially, a complete repetition of the course may not be necessary. With our diagnostic-driven adaptive release model, students can test out of previously mastered material so they can focus on the more difficult concepts they missed the first time around.

Stride Learning Solutions credit recovery courses are built to support learners who may need additional motivation and remediation. The courses feature a self-paced learning environment with embedded social emotional learning support and a growth-mindset approach to help students reframe their struggles as opportunities for future success.

Motivational learning objects encourage the development of intrinsic motivation, resilience, perseverance, self-awareness, and self-management to help students grow as 21st-century learners who are equipped to persist through challenges in school and life.

Why Stride Learning Solutions Credit Recovery?

- Our courses can be implemented fully online or in a blended learning environment during school hours, summer school, or at home.
- The curriculum is tailored to students who need extra help by using simplified explanations, interactive lessons with narrated audio clips, and vocabulary links.
- The curriculum is accessible and compatible with assistive technologies and devices such as screen readers.
- Built-in tools—like text-to-speech and translation support for 65+ languages—offer additional support for struggling students, English learners, and students with special needs.
- Unit or module-level assessments measure mastery of critical concepts and release content in accordance with the individual needs of the student.
- Credit recovery courses can be taught by your teachers or by K12's highly trained, certified teachers.
- Courses work on desktops, laptops, and tablets so students can learn anytime, anywhere.
